TO THE STOVE TRADE.

* * *

IN PRESENTING our Catalogue and Price List, we solicit your careful examination of our complete assortment, into which we have largely incorporated BRADBERRY'S PATENT ANTI-CLINKER FIRE LININGS, which are acknowledged to be the best fire lining ever introduced; the patent cut long center oven-door pedal attachment, quick-draft damper, and all the useful appendages that experience has proved desirable, and which for practicability, superb finish and adaptation to the requirements of the trade, are unexcelled by any other manufacturers. Having secured supremacy for fine castings and superior workmanship, we have constantly endeavored, with each succeeding year, to keep in advance of other manufacturers, and have thus far been eminently successful, and that we are exercising our best efforts to maintain our lead is evinced by the large number of handsome and practical stoves of various kinds that we offer you this year, among which are the Perfect Tremont Ranges, Tremont Steel-plate Ranges, Tremont Cooks, Electric Tremont, Tremont Parlor Stove, Tremont Cottage Parlor, Floral Tremont Parlor, Yantic Cooks, Iona Heater, Natural Gas Open Parlor, Menlo Heater, Hudson Heater, etc. Also, our Tremont Hot-air Furnace, and Shively Cold-air Extractor. A personal inspection of our goods will give you a much better knowledge of their appearance and quality than can be had by printed illustration. We will, therefore, be pleased to have you call at our salesroom, where we always have a full line on hand, which it will give us pleasure to show you, and when it is not practicable for you to call on us will always be glad to receive your communications via mail, which will receive our prompt attention.

Grateful for past favors and soliciting a continuance of the same, we remain,

Very respectfully yours,

THE ANSHUTZ-BRADBERRY CO.

ADVERTISING.

WE SHALL, on application, furnish free of charge any electro. plates which our customers may select from our catalogue, for advertising purposes.

TERMS.

THIS PRICE LIST is subject to a discount ofper cent. Bank Note at four months from date of invoice, orper cent. discount if paid within thirty days from date of invoice. Payable in New York or Pittsburgh par funds, without allowance for exchange. If the above terms are not complied with, the account will become due and collectible at the end of thirty days.

Prices and discounts are subject to change without notice.

Goods marked Net are subject to CASH DISCOUNTS ONLY.

All claims for abatement must be made immediately on receipt of goods.

All repair accounts net cash.

After obtaining a receipt of goods SHIPPED IN GOOD ORDER, our responsibility ceases, and claims for damage or breakage must be made of the Transportation Company.

The Perfect Tremont Range.

WE INVITE your attention to the cuts on succeeding pages of the **PERFECT TREMONT RANGE** for this season. It is constructed to meet the demand for a large, first-class heavy range, and possesses all these requirements. We call the attention of the trade to some of the features :

QUICK-DRAFT DAMPER.

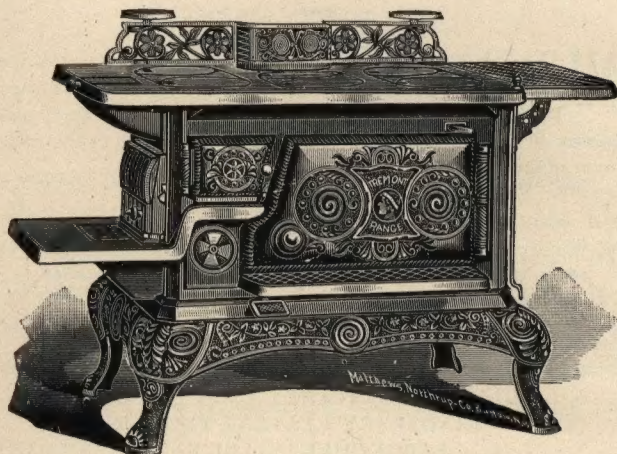

This is one of the most *valuable* improvements ever yet added to ranges, as with it cooking, ironing and washing can be done with the least possible radiation of heat into the room.

CARVED ORNAMENTAL BASE,
NICKEL AND TILE OVEN DOOR ORNAMENTS,
FULL SQUARE TOP,
BRADBERRY'S PATENT FIRE LINERS,
LARGE SHEET-STEEL BAILED ASH PAN,
PATENT CUT LONG CENTER,

BASKET OR SHAKING GRATE,
PATENT OVEN-DOOR PEDAL ATTACHMENT,
EXTRA DRAFT REGISTER,
PATENT RING LID,
TIN-LINED OVEN DOOR,

ENAMELED CAST-IRON RESERVOIR,
VENTILATED OVEN,
NICKELED TRIMMINGS,
ILLUMINATED FIRE DOOR,
NICKEL-PLATED TOWEL RACK,
ORNAMENTAL CRESTING WITH
NICKEL COFFEE-POT STANDS.

This range is constructed with pouch or swing feed, polished edges and cut tops. One damper controls range. The heat is applied to all the covers, and is made both right and left hand. Covers, centers, grates and liners fit both right and left range. Pipe collar can be put on top or back.

No. 3 pipe shelf fits all sizes.

The Tremont Steel-plate Range

STANDS to-day at the head of all Wrought-steel Ranges, and is recognized as the standard of its class, and the trade admits that it is more attractive, has more desirable features and special advantages of merit and is more saleable than any other range produced.

STEEL PLATE.

The indestructibility of steel plate, as compared with cast iron, at once establishes its superiority for cooking ranges. This homogeneous quality used in the manufacture of the Tremont Steel-plate Ranges has many advantages. Malleable steel is a high grade of metal in its purest state rolled into plates with a high pressure, that not only insures uniform thickness, but increases its density by compressing more closely its texture, making it permanently invincible to the acids produced at different stages of combustion.

Another strong recommendation in favor of steel plate is its excellence as a conductor of heat, securing equal expansion and contraction of all parts as subjected to the different degrees of heat, while it does not blister or scale, and owing to its density and fineness of grain, is not affected by rust. A few of the many advantages embodied in the Tremont Steel-plate Ranges are:

ASBESTOS-LINED FLUES.

The flues are asbestos-lined. Asbestos being a fire-proof material and a non-conductor, it prevents the heat from radiating into the room, and effectually keeps it within the range against the oven and tends to great economy in fuel, insuring great durability of the range and more pleasantness in the kitchen.

ASBESTOS DOUBLE BOTTOM.

The bottom flues are lined with asbestos, which forms a double casing. The advantages hereby obtained are the most excellent baking qualities and the economy in the consumption of fuel.

The action of the asbestos bottom is of the same nature as a baker's brick oven. As the fire passes around the oven, the asbestos being porous it absorbs the heat and radiates the same against the oven in a mild yet strenuous form, making an even, uniform and steady heat, and at the same time prevents the cold from without from cooling the bottom of the oven, but confines the heat within the range.

There is a great saving of fuel by this improvement, as the asbestos not only absorbs the heat which would otherwise go to waste, but also keeps the oven off an even temperature.

DOUBLE OVEN DOORS.

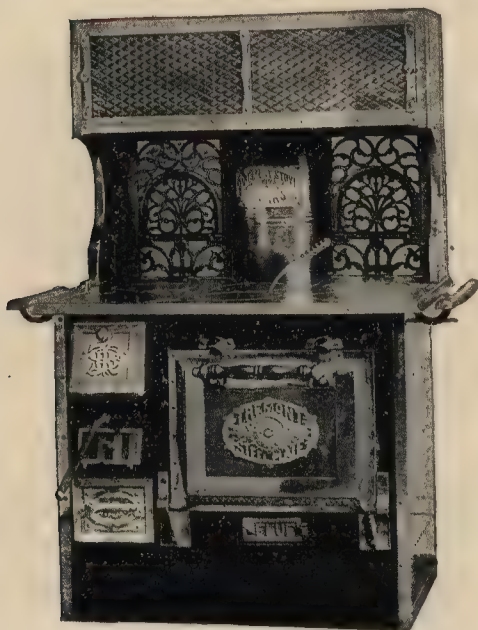

The oven door of the Tremont Steel-plate Range being double, it forms a dead-air chamber between the inside and outside casing of the oven door, which prevents the nickel plating tarnishing from heat and at the same time prevents the heat from radiating into the room, but retains it within the range.

WARMING CLOSET.

The top warming closet of the Tremont Steel-plate Range is made with sliding doors, which can be partly or wholly opened, thus preventing the escaping of more heat from the warming closet than is absolutely necessary, while placing in food to be warmed.

Another valuable improvement is the perforated back of the closet, with two drop shelves. The back of the closet being perforated, instead of solid, as in other ranges, allows the heat to escape back of the range instead of radiating into the face of the person cooking. The drop shelves are a great convenience for placing the utensils not in immediate use.

Taking into consideration the advantages enumerated above, with the elegance of design, substantial construction and the extremely low price at which it is sold, certainly makes it the best range ever placed on the market.

The
Tremont Steel-plate Range.

Tremont Steel-plate Range.

Flues are Asbestos-lined Throughout.

Ovens Thoroughly Braced and Bolted.

Made for Hard Coal, Soft Coal, Wood or Gas.

Elegantly Finished and Substantially Built.

No. 8-18.	" 18 x 18 x 12,	14.00

6-inch Pipe for all sizes.

THE preceding pages of this catalogue have been occupied with our list of Ranges and Cook Stoves.

We now call attention to our line of Parlors and Heaters, all of which are perfectly adapted to occupy a prominent place in any first-class Stove House, and are fully guaranteed to be made of the best material and in a workmanlike manner.

TREMONT PARLORS

THE

LEADERS.

THE TREMONT is entirely new in construction, and of modern and artistic design. The method of construction is such as to insure, beyond a doubt, the most powerful heater ever produced in open-front stoves.

The back of stove is double, thus leaving space through which cold air is taken from below (or from outside of house, if desired), and discharged through an opening above, near the top of stove.

Both sides of fire box are made similar to the back, thus greatly adding to its heating capacity.

The fire chamber is so constructed as to overcome contraction and expansion.

The smoke plate and fire back are the well-known Bradberry patent liners, the smoke plate being so modeled and held in position as to guarantee its durability and increase its heating capacity.

Our Patent Balance Blower and Paragon Grate are features with which the trade are familiar.

The ash pit door is opened by simply raising the foot-rail.

The stove is mounted on fancy base, with nickel blower handle, foot rail and panel above fire opening, in which there are three pieces of tile. The side columns are also ornamented each with five pieces of tile. The fancy top swings both ways from center, and is mounted with a beautiful bronze urn.

No. 2,	\$18.60
No. 3,	21.45

7-inch pipe for both sizes.

The New Tremont Parlor.

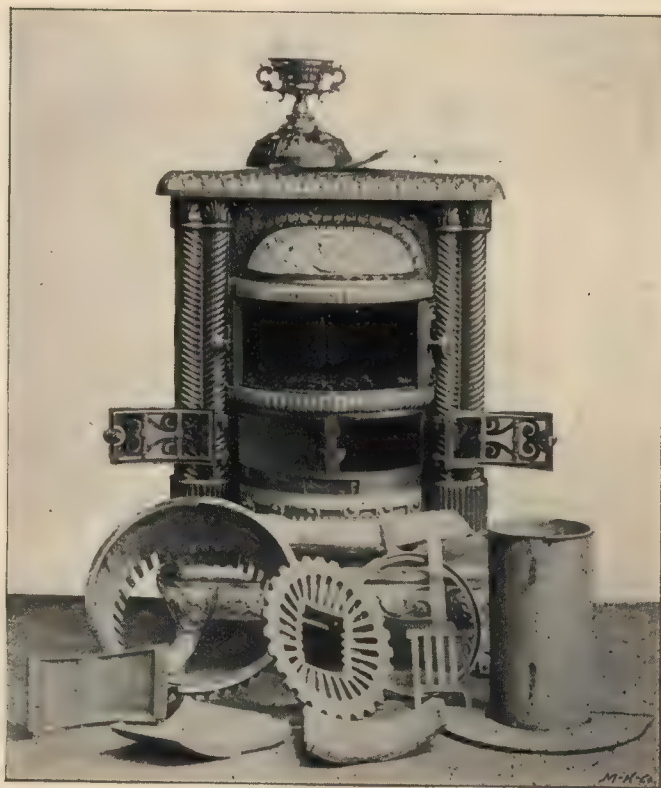

(See full description on page 30.)

Front View.

Electric Tremont.

A NEW OPEN-FRONT STOVE of the latest design, with bulge front, sliding upper mica doors, round fire-pot and draw center shaking grate, adapted to the use of bituminous and anthracite coal or natural gas, cast-iron back and heavy liners.

Inside Construction.

Electric Tremont.

FULL nickel trimmed includes nickel urn, swing top, name plate, dome plate, foot rail, feet and skirting and bands above both set doors.

The grate can be replaced with ease in a few minutes.

Has all the advantages of the closed stoves and at the same time can be used for open by sliding mica doors. A lid hole on top can be used for a tea kettle.

The Tremont Parlor.

The above parlor is so well and favorably known as to need no comment.

Made in three sizes.

No. 30.	Fire opening, 7 x 15,	\$14.30
No. 35.	" " 7 x 17,	17.15
No. 45.	" " 8 x 20,	24.30

BRADBERRY'S PATENT COMBINATION FIRE LINERS.

The Floral Tremont.

Just Completed.

A BRIGHT, handsome, cheap parlor stove for coal, suitable for sitting, dining or bedroom, and equally adapted for use of gas. It is made in the latest style, with fancy top ornament, lid hole, tile lining, swing hearth, two nickel top ornaments, two pieces in nickel tile plates on front and nickel name plate. This stove also has sheet-steel back, and is all ready drilled for pipe connections for gas. Altogether, it is very artistic and well made.

No. 12,	\$ 7.86
No. 14,9.29
No. 16,	10.72

Nos. 12 and 14 require 6-inch pipe. No. 16 requires 7-inch pipe.

Tremont Cottage Parlor.

Best Low-priced Parlor in the Trade.

THIS stove has two lid holes and portable center beneath, fancy swing top basket or shaking grate, pipe collar on top or back of stove. The sliding front doors, assured against catching, afford a practical open-front stove. Large ash pit. Cast-iron lining. For soft coal or wood.

No. 19.	Fire opening,	$10\frac{1}{2} \times 5\frac{3}{4}$,	\$ 7.15

A reduction of 75 cents net when wood linings *only* are needed.

Nos. 19 and 23 require 6-inch pipe.

No. 26 requires 7-inch pipe.

Natural Gas.

THIS stove, before the public now for eight years, has won for itself a reputation among gas stoves of which we are justly proud.

Having had a *large* and *varied* experience in the use of natural gas, we have been enabled to give to the trade an open gas stove that has no equal, and at a price within the reach of all. This stove is supplied with our patent noiseless burner, which is tapped on either back or bottom, by reversing an L-shaped plate on the burner. It is elegantly mounted with fancy top and urn, lid hole on top, a column of enameled tile on each side, and a very handsome nickel tile plate, set with three pieces of tile. It is ready for the plumber to make connections, either in bottom or back. Our burner has a reversible plate, so that it is but a minute's work putting burner in shape. The stove is drilled in back and bottom, thereby saving expense. It is also mounted on a fancy base and has liners cast with a neat ornamental figure. The stove is, in fact, a perfect natural gas burner, as its name implies, and is an ornament in parlor, office, bed or sitting room. We can fully guarantee it.

See cut on page 39.

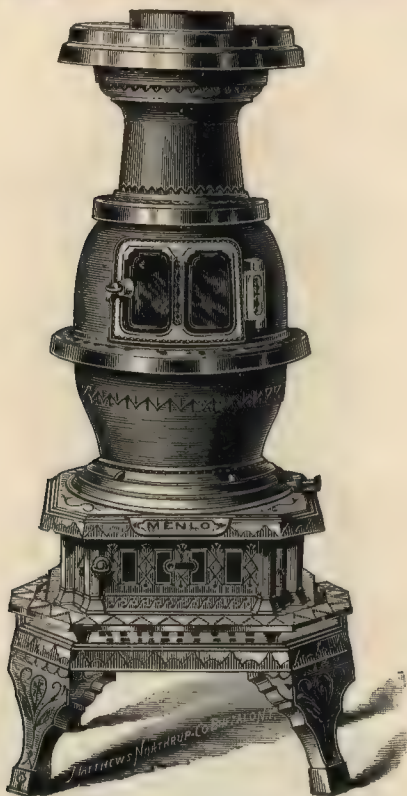

The Natural Gas.

No Drilling Required. Ready for Connections.

The Vulcan.

A large, plain and durable heating stove, with ash pan and stationary grate.

No. 1,	\$9.00
No. 2,	14.50

The Ionia.

THE IONIA is of an entirely new and handsome pattern, and will be found very desirable to the trade. For neatness of design and smoothness of castings this stove is excelled by no other heavy round stove in the market. This stove has all the good features of the old heavy common stove, and in general appearance will compare with the best finished stoves in the trade. The Ionia claims superiority in the following points:

HEAVY FIRE-POT, FLAT TOP WITH LID, EXTRA LARGE ASH PAN, REGISTERED ASH-PIT DOOR, DEEP ASH PIT, POKER HOLE WITH COVER, SHAKING AND DUMPING GRATE, HANDSOME FOOT RAILS, EXTRA LARGE FEED DOOR WITH REGISTER, CUT TOP TO PREVENT CRACKING BY EXPANSION.

No. 3, \$10.00
No. 4, 12.15
No. 5, 15.00

No. 6, \$18.60
No. 7, 21.50

Nos. 3 and 4 require 6-in. pipe.

Nos. 5, 6 and 7 require 7-in. pipe.

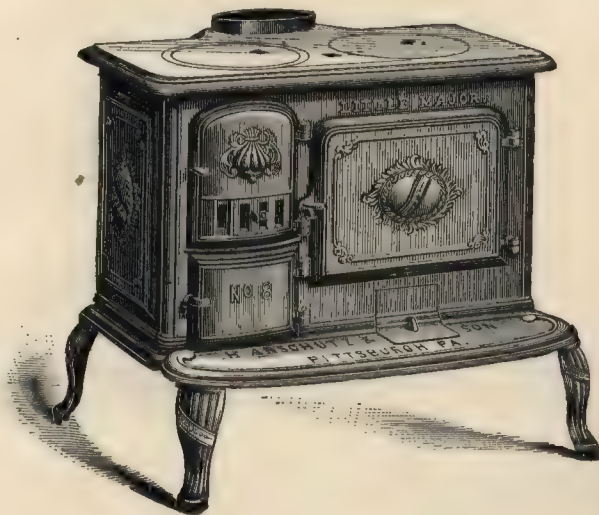

The Ionia.

With Drum.

(For description see page 45.)

The Little Major.

The only two-holed range made in this city. Has had an extensive run and has given satisfaction.

No. 8. Oven, 11 x 12 x 9, \$7.88

Requires 5-inch pipe.

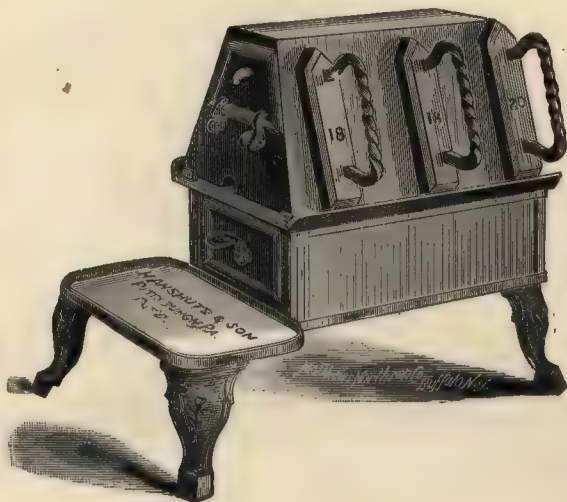

The Alvin.

A very desirable two-holed stove. Neat design and cast lining.
The largest of the kind in the market. Pouch feed.

Two sizes.

No. 7,	\$4 50
No. 8,	5.25

Tailors' Stove.

Our own patent. The very best stove for tailors' use, in the market, as it heats *fourteen irons*, and at the same time heats the room.

One size only.

No. 1, \$12.00

Tailor irons, 6 cents per pound.

Requires 6-inch pipe.

The Laundry Stove

WILL accommodate eight sad irons; has very heavy fire-pot. No. 1 has 17-inch hole on top, and, when cone is not used, will admit a large wash kettle. No. 3 has 19½-inch hole on top. Two rings are used to reduce boiler holes.

No. 1, with cone top,	\$11.25
No. 1, without cone top,	9.75
No. 3, " " "	12.60

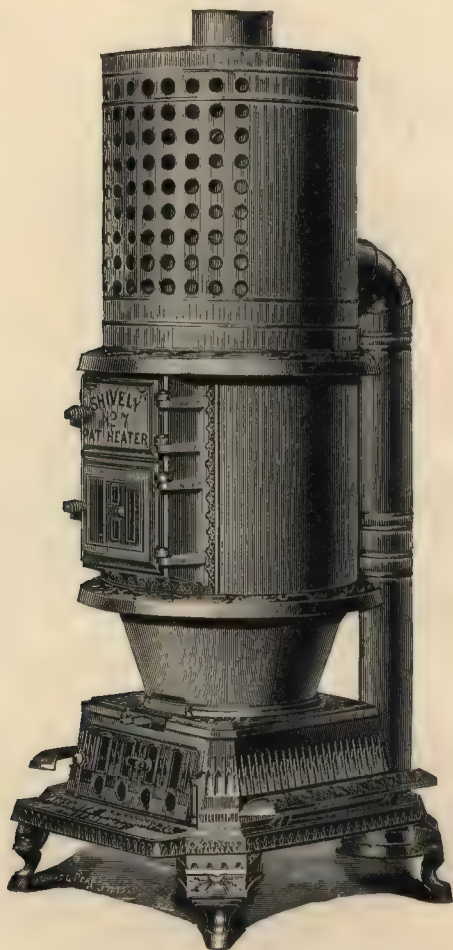

No. 1 requires 5-inch pipe. No. 3 requires 6-inch pipe.

The Shively Heater.

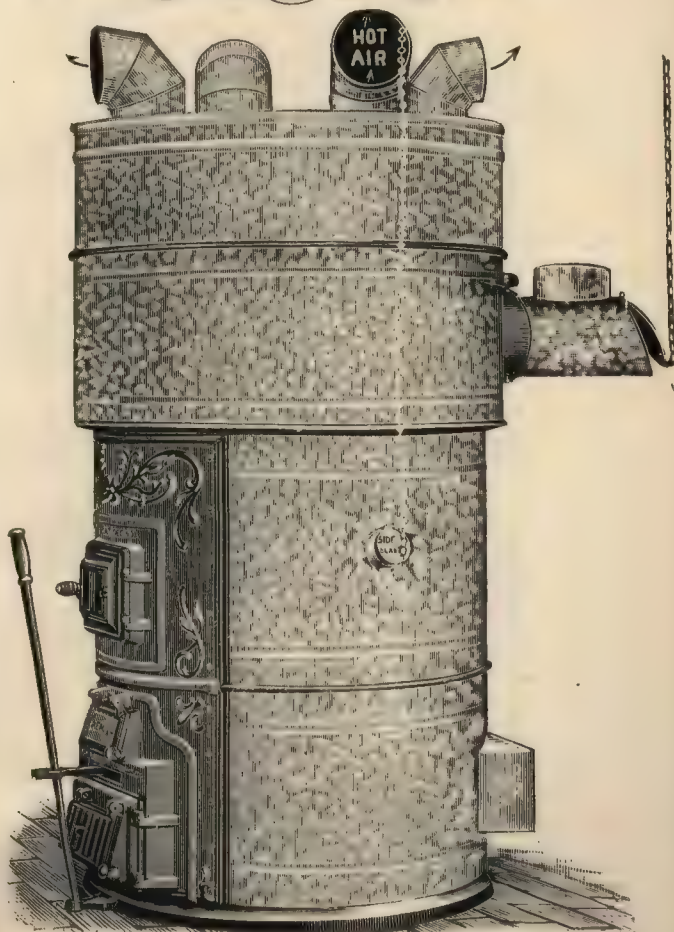

TO CONSTRUCT a stove that would evenly distribute the hot air, so as to provide an even temperature in all parts of a room, has been the ideal study of stove manufacturers for many years. This we claim to have in its most perfect form in the SHIVELY HEATER, OR COLD-AIR EXTRACTOR. It is a well known fact that cold or impure air, being heavier than the ordinary atmosphere in a room, falls to the floor. We, therefore, by means of a syphon flue, the opening of which is close to the floor, draw all the cold and impure air from the floor into the extractor, throwing the same out into the room both heated and purified. It is guaranteed to evenly heat a larger room than any other stove ever made and is much more economical in the use of fuel. It will burn equally well either Coal, Wood or Natural Gas. We desire to call the special attention of School Directors, Church Committees and Merchants to its perfect adaptation for thoroughly heating and perfectly ventilating school buildings, churches and store rooms; it is the only ventilating heater which will prevent the windows from frosting in the winter season. If the heating device you are now using is not in all respects satisfactory, or you fail to keep an even temperature at all times, we ask you to investigate the Shively Cold-air Extractor.

School-house Stove.

WE respectfully invite the attention of the public, and particularly school trustees, teachers, ministers and superintendents of school buildings and public halls, to our *Improved Patent Heater and Ventilator*, the best yet devised. It is in use in twenty school houses in the cities of Pittsburgh and Allegheny, as well as many other cities and villages in different States. We can furnish testimonials by many who have had opportunities to observe various methods of heating, in regard to durability, economy of fuel, regularity of temperature, power to keep the air pure, and to preserve the necessary degree of moisture.

The Summer Tremont.

With our Patented Atmospheric Burner.

FOR NATURAL GAS.

THE comfort and convenience of this stove are apparent to all house wives, as cooking, baking, washing, ironing, and, in fact, all kitchen work can be done without the annoyance and discomfort from the heat attending the use of the ordinary cook stove or range, or the trouble or danger arising from the use of either oil or gasoline stoves. Our atmospheric burner guarantees perfect combustion and freedom from both smoke or smell. If gas is used by meter the cost will not exceed *ten cents per week.*

See cut on succeeding page.

Sugar Kettles.

New Style.

THESE kettles are made from the very best iron. They have smooth surfaces, and each one is painted.

The principal advantage in handling these kettles is that they are rated at their exact capacity, and they are sold per piece instead of by weight. In comparing prices, a new-style kettle costs just about the same as an old-style kettle of the same capacity.

This is undoubtedly the best kettle to buy. Try a sample lot.

Cold-handle Sad Irons.

Patented March 13, 1888 and July 9, 1889.

Superior to all other Irons. Detachable Wood Handle.

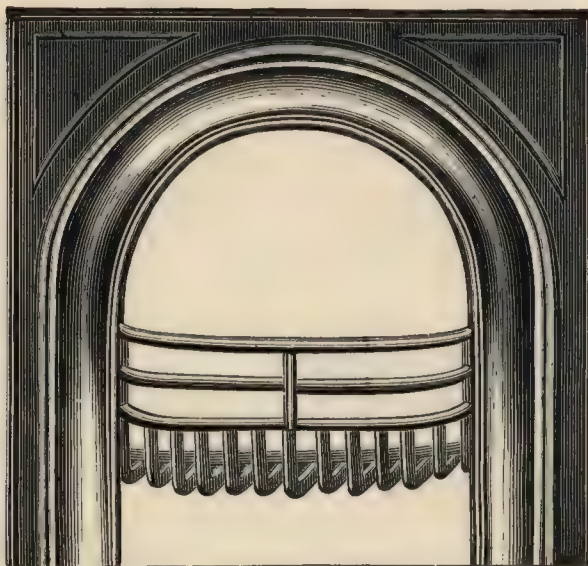

THESE irons are very highly polished. The handle is made of selected apple wood, worked out perfectly by machinery, and splendidly finished. Its shape adapts it better to the hand than any handle in use to-day. The handle is adjusted by pressing on the knob with the thumb; is easily adjusted, holds perfectly tight, and cannot be shaken off. No danger whatever of burning the hand.

Each set packed in a heavy strong card-board box.

Three irons, one handle and a stand, are a set.

Plain polished,	\$24.00	per dozen sets.

THE DAISY WROUGHT-IRON

Adjustable Stove Truck.

Patented February 13, 1872; October 1, 1878; July 1, 1879; December 30, 1879; July 6, 1880.

THE frame is wrought iron. It is simple and very easily adjusted. It is not clumsy under your stove. By cutting off bars you can reduce it to 12 x 12. A board placed on top of it gives you a perfect floor upon which to rest your stove while setting it up. Only one size necessary for all stoves.

Daisy Trucks (4 Martin casters), net, \$24.00 per doz.

Solid-steel Spiders and Griddles.

Wrought Steel; Seamless; Handles do not become Heated; Brilliant Finish.

These "SOLID-STEEL" Spiders and Griddles are wrought from high temper steel.

They absorb NOTHING.

Grease CANNOT go below the surface.

They give no odor of one thing while cooking another.

They cannot warp.

They CANNOT BE BROKEN.

Food will not burn in them. They last for ever.

We warrant every one of them.

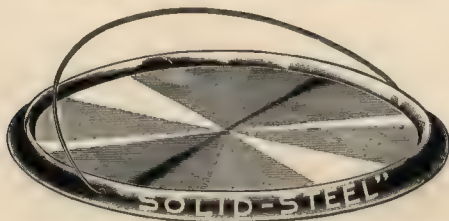

LIST OF PRICES.
